Subject: Accept Ruling

As a Washington State citizen and as a small business owner I request that you accept the ruling on the Microsoft case. This case has done irreparable harm to our economy both here in Washington and nation wide. The anti trust attack upon this innovative industry and against this innovative company is inappropriate. The target is moving so fast in the technology sector that old views and perspectives regarding antitrust do not apply.

Please accept this ruling compromise so that we as a state and a nation can get back to business.

Thank you,

Craig Riley
